Department of Biology
Summer Session Policy

I. Preamble

Summer session is an opportunity to provide courses for students outside of the standard academic year. The University and the College determine how net revenues from the summer session instruction are allocated. In collaboration with the Dean’s office, departments and programs coordinate opportunities for faculty to teach courses during summer session.

Since departments are expected, at minimum, to break even, they should think carefully about the cost of resources they invest in summer courses relative to the anticipated enrollments. If the tuition income does not cover the cost of offering summer courses, reimbursement will be due to the College.

This policy concerns summer session appointments for tenure-related, non-tenure-track, and pro tem faculty only; summer appointments for graduate students are governed by the GTFF collective bargaining agreement.

II. Determination of Course Offerings

Prior to scheduling courses for summer session, and during the settle-up period after summer term is over, the Dean’s office will provide departments and programs with guidance on summer session course planning, including budgetary guidance on how net revenues will be allocated to departments and programs and schedules for determining enrollment needed to break even for various levels of instructor compensation.

The Biology Summer Session Curriculum Coordinator will consult with the Biology Curriculum Coordinator and the Biology Department Head to determine which courses will be offered based on the curricular needs of the department and student demand. There have traditionally been four areas of course offerings: 1) 100-Level Non-Majors, Group Satisfying Courses, 2) 200-Level General Biology Courses, 3) 300-level Biology Area I, II and III Courses, and 4) 400-level Field and Organismal Courses.

III. Assignment of Instructors to Courses

Summer instructional contracts are distinct and separate from nine-month, academic-year contracts. An offer of a summer session appointment will be made at least five weeks prior to the beginning of the appointment, whenever feasible. Except as described in Article 18, Section 5 of the 2015-18 United Academics CBA, a bargaining unit faculty member on an academic-year appointment is not required to accept a summer session appointment, and will not be subject to discrimination and/or retaliation for declining a summer session appointment.
During the fall term, the Biology Summer Session Curriculum Coordinator will identify curricular needs to be filled during summer session. Details such as specific courses to be offered, timing for courses, and non-instructional or other obligations accompanying the instructional assignment should be determined as much as possible at this time.

Priority for teaching assignments will be given to the faculty member (TTF or NTTF) who is most qualified to teach each particular course. In many cases, the assignments will be offered to the faculty members who have taught the courses in the past. When a new faculty member is needed to teach a particular course, an email will be sent to all TTF and Career NTTF asking if anyone is interested in teaching a particular course. In the case of the General Biology courses, this will require a commitment from the faculty member to work with other General Biology faculty during the regular academic year to ensure that the course content in the summer is similar to how the course is taught during other terms. This is important since these courses are part of a sequence.

IV. Professional Responsibilities of Instructor During Summer Session

Professional responsibilities of faculty teaching summer session courses are identical to those connected with teaching a course during the academic year. This includes holding weekly office hours, answering standard advising questions that arise for students, and standard duties associated with administering the course that arise even before or after the summer session term (e.g., finalizing grades of “incomplete”). The following principles will determine what constitutes a full-time workload during the summer term:

A. The FTE assigned a course must be the same no matter who teaches the course.
B. A standard 4-credit academic course taught in a 4-week term constitutes .9 FTE for that term. This equates to .3 FTE prorated across the entire 12-week summer session.
C. 3- and 5-credit courses are counted the same as 4-credit courses for the purposes of calculating faculty FTE.
D. FTE for courses carrying other amounts of credit is prorated on a 4-credit standard.

Any exception to these principles must be appropriately documented and approved through prior consultation with CAS.

The combination of summer research and instructional appointments for the same faculty member must not exceed 1.0 FTE across all parts of summer session. See the addendum for a table showing FTE for various summer session appointments and cases where assignments greater than 1.0 FTE within a given term are likely to be approved by CAS.
V. Compensation

Summer-session base salaries may differ from academic-year base salaries, except in cases of required summer-session assignments described in Article 18, Section 5 of the 2015-18 United Academics CBA.

Summer base salaries in Biology are set in categories corresponding to differences in faculty classification, rank, and/or experience. Base salaries for all faculty in a given category will be set in a manner that incentivizes qualified faculty to accept summer session assignment, but that also generates net revenue.

The Department of Biology, has three categories
1. Career NTTF and TTF
2. Pro tem NTTF with a PhD
3. Pro tem NTTF.

Base salaries for teaching during the summer session must be approved by the Dean’s office and cannot exceed the instructor’s academic-year salary, except in extraordinary circumstances and with approval from the dean.

Lab sections are usually taught by GEs, but may be offered to a faculty member (TTF or NTTF) if a qualified GE cannot be found.

VI. Course Cancellation

Summer session is similar to other self-support programs where each course has a clear cost and tuition revenue connected to it. As such, summer session courses that do not have sufficient enrollment prior to the scheduled start of the course will be cancelled. This arrangement will be clearly stated to the faculty member in the appointment notice for this voluntary assignment. There are times when a summer session course may be offered, based on pedagogical or other academic principles, even when it generates a net financial loss. For example, a key methodological course to train incoming graduate students might fall into this category.

In the event that a course is cancelled, the department or unit will attempt to appoint the bargaining unit faculty member to a new assignment.

VII. Research Appointments During the Summer
To comply with federal requirements, when a nine-month faculty member is funded at 1.0 FTE on a research contract during the summer, the faculty member must work exclusively on that project. Faculty members should not accept 1.0 FTE summer research appointments for any period of time when they will not be working on the project. To comply with federal regulations, non-instructional summer pay funded by a sponsored project is based on a faculty member’s academic-year base salary. Professional responsibilities are specified by the principal investigator (or designee) and/or by the agreement with the granting agency.
ADDENDUM I

I. FTE Assignment by Type of Summer Course

Summer term FTE should be based on what the course FTE would be during an academic year. In CAS, a course is typically .1 FTE annually or .3FTE during a term. 3- and 5-credit courses are counted the same as 4-credit courses for the purposes of calculating faculty FTE. FTE for courses carrying other amounts of credit is prorated on a 4-credit standard. Course credit hours and their associated 12-week contract FTE are as follows:

<table>
<thead>
<tr>
<th>Course Credit Hours</th>
<th>12-week Contract FTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>.075</td>
</tr>
<tr>
<td>2</td>
<td>.15</td>
</tr>
<tr>
<td>3, 4 or 5</td>
<td>.30</td>
</tr>
<tr>
<td>8</td>
<td>.60</td>
</tr>
<tr>
<td>12</td>
<td>.90</td>
</tr>
</tbody>
</table>

Web-based course FTE is normally the same as for conventional non-online courses.

Other situations require prior consultation with CAS to set FTE.

II. Examples of Summer Term Overload Assignments

Examples of summer-term overload assignments (> 1.0 FTE within a summer term) that are currently likely to be approved by CAS:

A. One 3, 4 or 5-credit course in fewer than 4 weeks, assuming that the shorter interval does not necessitate an unrealistic level of student engagement.

B. Two 3-, 4-, or 5-credit courses during one of the three 4-week summer terms, but typically not in two such terms.
